GoDirect Trade BETA

High five! You just received an order request from

Congratulations – you just made a sale on GoDirect Trade!

Below are the order request details. Your buyer has received an **order request confirmation email** but that doesn't mean the order is officially placed. Here are your next steps:

1. Use the order details below to input this order into your system within (1) business day.

2. Make sure you send the customer a separate **order confirmation email** to let them know you are working to ship their order. If your existing system does not send order confirmation emails, you can go back into your storefront Dashboard to change the order status to "Confirmed". This will trigger an order confirmation email to the buyer.

3. **NOTE:** If the inventory is no longer in stock, please notify the buyer immediately. Send the buyer a convo.

4. Once the order has shipped, if your existing system does not send shipment confirmation emails, you can go back into your storefront Dashboard to change the order status to "Shipped". This will trigger a shipment confirmation email to the buyer.

5. GoDirect Trade does not send invoices. If your buyer requires an invoice, please send them an invoice directly through your own system.
